Did you know? A recent study conducted by
DOL's Employee Benefits Security Administration (EBSA) revealed that:

- 30 percent of the audits (3 out of 10) contained major deficiencies with respect to one or more relevant generally accepted auditing standards requirements. This puts \$927 billion and 11.7 million plan participants and beneficiaries at risk.
- Deficiencies were more likely among firms that performed smaller numbers of EBP audits.

Failing to engage a competent, independent accounting firm to conduct your employee benefit plan audit may result in inaccuracies in reporting and delays in submissions, ultimately leading to significant fines and consequences.
